MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Official Policy Statement 200-1, Installation Environmental Management

1. Picatinny Arsenal is committed to an active policy of protecting our environment for all of our activities. This installation environmental policy statement applies to all government and contractor employees, to include tenants that work at Picatinny. This policy is based on our commitment to the following:

- Protecting and enhancing our ecologically sensitive areas
- Implementation of an Installation-wide Environmental Management System (EMS)
- Efficiently accomplishing our mission, while preventing future liability
- Aggressively promoting & instilling proper environmental management through awareness training
- Accountability of all affected media through management plans

2. To accomplish these objectives, we have implemented an environmental management system similar to ISO 14001 with programs for reducing or eliminating the generation of waste through source reduction and other pollution prevention methodologies. We must comply with all applicable laws when impacting all areas of our environment. This policy extends to solid and hazardous wastes, air, water, wastewater, groundwater and soil.

3. The installation Environmental Affairs staff is responsible with providing guidance to this installation and ensuring compliance with not just the Army's requirements, but also Federal and State environmental laws. Picatinny Arsenal will perform internal reviews and audits to ensure compliance with applicable laws and regulations. Internal regulatory violations can and will be issued by the Installation Environmental Coordinator for those who fail to comply or correct deficiencies in a timely manner. This installation will provide required training to ensure the work force is aware of their responsibilities to the environment. Picatinny will endeavor to restore previous and any future contaminated properties to an acceptable environmental condition.

4. Proper environmental management is the responsibility of all personnel. Picatinny is committed to continual improvement of our environmental management system, implementation of an aggressive pollution prevention program and restoration through encouragement and involvement of all employees. Proper environmental management is part of doing business here at Picatinny Arsenal.

5. The proponent for this policy is the Environmental Affairs Division of Public Works, AMSTA-AR-PSE, Mr. Thomas J. Solecki at extension 45818 or Mr. Joseph P. Clark, at extension 45951.
